## Citycold refrigerator-freezer in drawers

The FESTIVO Citycold refrigerator-freezer is a drawer unit sized for kitchen furniture which can be placed under the worktop and brings a new way of thinking to kitchen design and cold storage. The Citycold refrigerator-freezer has two drawers, the upper one for food that requires cold storage and the lower one for frozen products. Both drawers are automatically defrosted.

Due to its dimensions, Citycold is suitable for installation in the 600 and 800 mm modules of kitchen cabinets and islands. The ergonomic cooling device solution also facilitates barrier-free living if necessary.

The front sets of kitchen cabinets (furniture doors) can be integrated into the appliances so that the entire kitchen line has a uniform appearance. Furniture front plates and handles are not included in the factory delivery.

The drawer cabinet also works as an independent unit, in which case it is equipped with factory-installed steel masks. The color options of these front plates are white, black or stainless steel. In this case, a white, black, or oak-colored laminate cover is available as an accessory.

The drawers close softly, thanks to the soft closing slide rails.
