

FESTIVO

Household refrigeration appliances

Suomen Kotikylmiö Oy

Each Festivo product is manufactured by Suomen Kotikylmiö Oy, established in 1994. We are the only Finnish company to manufacture refrigeration appliances in Finland.

With our factory situated in Hollola, we provide work for approximately 50 people. Our whole personnel shares the desire to create durable, high-quality appliances through careful and precise workmanship. Festivo products are deservedly the pride of any kitchen!

All of our refrigeration appliances are up to 80% Finnish. We use local partners as much as possible during the manufacturing process. Our products carry both the Finnish Key Flag and the Design From Finland symbols.

Suomen Kotikylmiö Oy is part of the Finnish Festivo-Porkka Group.

Cold storage expertise at the heart of the home

Festivo is a stylish and well-considered choice to compliment your kitchen with its unique design.

Representing top quality Finnish design expertise, the spacious Festivo refrigeration appliances are reliable and easy to maintain – built to endure the challenges of everyday life and serve your kitchen for up to several decades to come.

With our range of 11 refrigeration products, you will be able to create stylish and spacious kitchen solutions to suit your needs. You can choose how to combine the refrigerator, freezer and wine cabinet, and get exactly the kind of cold storage you want.

Even the interiors can be tailored to suit your personal needs.

As in industrial kitchens, the refrigerator is cooled by a fin evaporator, guaranteeing a cooling that is more efficient and even, as well as faster, compared to regular refrigerators. Your food will stay fresh and delicious for longer and there will be less waste!

In addition to sharing qualities with industrial equipment, Festivo also has distinct measurements designed for optimal kitchen functionality that differ from other products on the market. This will give your kitchen a unique touch.

Festivo is a durable choice. Our maintenance service is fast and efficient, and we have spare parts available for equipment that is up to 20 years old.

Sustainability, durability, serviceability – these are the central qualities of Festivo. By choosing Festivo, you will get a top quality cold storage appliance made with precise Finnish expertise!

IMAGE: Festivo Trio includes either the 55 CM refrigerator or the 75 CM refrigerator, the 45 VLM wine cabinet and the 45 FM freezer.

Customizable interior

The height of the refrigeration appliances (206 cm) is standard, but there are many options for width. You will always get the appliance best suited to your kitchen and needs!

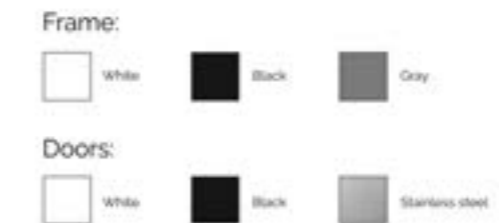

You can choose different colors for the frame and the doors. Color options for frames are white, black and gray. For the door, you can pick either white, black or stainless steel. Our refrigeration appliances enable you to change the interior with separate accessories.

Design your own Festivo! (in Finnish)

Standard features include one NOLLA drawer for the freezer and one HEVI drawer for the refrigerator. More information about the fixed interior accessories is available on page 12 for the freezer and page 9 for the refrigerator.

As additional accessories, you can also get the KAPPA root vegetable container or the KIRA container series.

Refrigerator

Replace the traditional refrigerator with Festivo and get plenty of space for your fresh foods!

A traditional refrigerator uses a plate evaporator at the back wall for cooling. Festivo uses a fin evaporator placed at the top of the appliance. A fin evaporator is larger and more powerful than a plate evaporator, guaranteeing an even temperature inside the refrigerator. The fin evaporator also keeps the relative humidity inside the refrigerator high. This humidity works as a type of cold conductor inside the cupboard. Thanks to these qualities, food simply stays fresh for longer inside the Festivo refrigerator!

One practical difference is that food will never freeze to the walls, no matter how you try.

Refrigerators come in five different size categories. The models include two single-door refrigerators and three double-door refrigerators.

Standard features for refrigerators

You can modify the interiors of single-door refrigerators, or combine them with a freezer into a refrigerator-freezer (p. 18). Double-door refrigerators are only available with standard features.

Single-door refrigerators come equipped with one HEVI drawer as a standard accessory, and double-door refrigerators with one HEVI drawer behind each door. Single-door refrigerators can be equipped with a maximum of three drawers on top of each other.

The HEVI drawer is designed for storing fruits and vegetables. The temperature of the drawer is five degrees higher than the refrigerator, between +8...+12 C.

Fixed accessories

In addition to HEVI drawers, single-door refrigerators can also be equipped with an additional KYLMÄ drawer, which is designed for storing perishables that require a refrigerator temperature.

The KYLMÄ drawer allows for more storage space that is separate from the rest of the refrigerator. The drawer is perfect for storing loose jars and beverage cans, which would otherwise be easily lost among the shelves of the appliance. For example, the KYLMÄ drawer of the 75 CM refrigerator can fit an impressive 40 units of 0.3 liter cans.

It is also an excellent aid for bakers in cooling or storing baked goods without letting the items get in the way of other foodstuffs.

The drawer has the same temperature as the refrigerator, between +2...+7 C.

KYLMÄ drawers can be installed one per refrigerator. It is installed above the bottom insert tray and allows for a maximum of two HEVI drawers underneath it.

Additional accessories for the refrigerator: KAPPA root vegetable container and KIRA container series.

Factory-installed accessories for single-door refrigerators

	HEVI + KYLMÄ	HEVI2	HEVI2 + KYLMÄ	HEVI3
Capacity 55CM (L)	46	50	71	75
Capacity 75CM (L)	71	76	109	114

Single-door refrigerators 55 CM and 75 CM

The 55CM and 75CM refrigerators always come standard with one HEVI drawer. Because of the movable insert tray, refrigerators can fit an additional 2–3 drawers as accessories.

An efficient LED light at the top of the refrigerator provides pleasant high-quality lighting.

The refrigerator comes standard with 4 full-depth glass shelves and one smaller glass shelf. There are 9 height options for placing the shelves.

The edge of the shelves is protected with an aluminum trim.

As an additional accessory, one KYLMÄ drawer can be installed above the bottom insert tray and used for storing items that require a refrigerator temperature. The drawer is also perfect for storing beverages. One of the refrigerator glass shelves then acts as a cover for the drawer. Temperature +2...+7 C.

1–3 HEVI drawers with dampened rails can be placed underneath the movable insert tray. These drawers provide an ideal temperature and humidity for storing fruits and vegetables. Temperature +8...+12 C and relative humidity up to 90%.

Properties and accessories		
	55 CM	75 CM
LED lightings	yes	yes
Glass shelf	4 + 1	4 + 1
Door lockers	4	4
HEVI (capacity)	standard (25 l)	standard (38 l)
HEVI2	accessory (module total capacity 50 l)	accessory (module total capacity 76 l)
HEVI3	accessory (module total capacity 75 l)	accessory (module total capacity 114 l)
KYLMÄ drawer	drawer (21 l)	drawer (33 l)

Additional accessories: a door lock (handle cannot be turned), KIRA containment series, a KAPPA root vegetable container, an extra glass shelf.

Double-door refrigerators 90 CM, 100 CM and 120 CM

Double-door refrigerators are the best solution when more cold storage is needed. The 120 CM refrigerator has a capacity of an impressive 850 liters! The 90 CM refrigerator has a capacity of 600 liters, and the 1-meter wide refrigerator a capacity of 700 liters.

Behind two full-height doors, you can easily fit all foodstuffs that require refrigerator temperatures (+2...+7). Behind both doors, there is a HEVI drawer for fruits and vegetables as standard (+8...+12).

When you place products in their ideal temperatures, they stay fresh for longer. Among the benefits of double-door refrigerators are their two-part, full-width glass shelves that maximize storing capacity.

The refrigerators come standard with efficient LED lighting.

You can also order a KIRA containment series or a KAPPA root vegetable container as additional accessories.

Note! Double-door refrigerators come equipped with standard features and cannot be enhanced with additional fixed accessories.

No Frost freezer 45 FM

This freezer has an impressive 18 kg/day freezing efficiency. It is a compact freezer with a storage capacity of 195 liters. In actuality, the Festivo freezer can fit in a lot more than its capacity would suggest.

For example, you can effortlessly fit in even a large frozen pizza by removing the glass shelf between the second and third hatches and placing the pizza in a standing position.

An efficient LED light provides pleasant high-quality lighting.

festivo.fi – freezer

Check out our freezer!

At the top, there are two freezer shelves with lift-up hatches. Temperature -18...-24 C. The midsection of the freezer has 3–4 sturdy baskets with transparent covers. Temperature -18...-24 C. The glass shelves are removable and easy to clean.

The lower section of the freezer comes standard with one NOLLA drawer. The NOLLA drawer offers excellent conditions for storing all fresh products, such as fish and meat. Temperature ± 0 C. Because of the movable insert tray, there can be up to two of these drawers, which are additionally equipped with dampened rails, accessory NOLLA2.

NOLLA freezer drawer for fresh storage

Designed for storing fresh products, the NOLLA drawer (± 0 degrees) keeps meat, fish and chicken products fresh for longer, prolonging their shelf life. The NOLLA drawer is also excellent for the quick cooling of beverages. The drawer has a capacity of 16 liters, with a maximum of two drawers per freezer.

Properties and accessories	
No frost function	yes
LED lighting	yes
Freezer hatch	2
Freezer basket	4 (3 if equipped with NOLLA2 accessory)
NOLLA	16 L (standard feature)
	
NOLLA2	Module total capacity 33 l (accessory)
	
Lock	A lock on the door prevents the handle from being turned (accessory)

Refrigerator-freezer

Durable, high-quality household cold storage that has ideal conditions for storing all different food groups with its refrigerator, vegetable container, zero compartment and no frost freezer. Refrigerator-freezers come in three sizes.

The Festivo refrigerator-freezers are built from a combination of a 55 or 75 cm wide refrigerator and a 45 cm wide freezer, resulting in two sizes to choose from: 120 cm or 100 cm. The model range also includes a 75 cm wide refrigerator-freezer that has the freezer drawer and zero compartment beneath the refrigerator. This model is also available with two freezer drawers.

Refrigerator-freezers 100 CFM and 120 CFM

The standard model refrigerator-freezers 100 CFM and 120 CFM consist of a refrigerator module and a freezer module. The refrigerator with its full-height door comes standard with one HEVI drawer for fruit and vegetables. The freezer with its full-height door comes standard with one NOLLA drawer for meat and fish.

You can buy a maximum of two additional drawers for the refrigerator and one NOLLA drawer for the freezer to upgrade your double-door refrigerator-freezer.

Standard model refrigerator-freezers 100 CFM and 120 CFM come with a shared plinth and a cabinet connection set. Both modules have their own electrical connection. This means that installation requires two power outlets.

festivo.fi – refrigerator-freezer

Check out our refrigerator-freezers!

100 CFM

120 CFM

The position of the handle must be specified for both the refrigerator and freezer when placing an order. However, the left/right-handedness of each module can be swapped later by turning the door and handle around. After the swap, the logo is moved to the top of the door. You can order the set for changing the handle position from Festivo spare parts service at huolto@festivo.fi.

Refrigerator-freezers 75 CF0 and 75 CFF

Refrigerator-freezers 75 CF0 and 75 CFF are compact with single doors and can easily fit into smaller kitchens, as well. The refrigerator has plenty of space for storing fresh food. It comes standard with one KYLMÄ drawer.

The 75 CF0 model comes standard with two drawers underneath the refrigerator. The upper drawer is a 44-liter freezer with an automatic defrosting function, and the lower is a 35-liter NOLLA zero-degree drawer for storing fresh products, such as meat, chicken and fish.

In the 75 CFF model, both of the drawers underneath the refrigerator are freezers with automatic defrosting, totaling a capacity of 79 liters combined.

Wine cabinets 45 VLM and 50 VL

Store and cool your wine under the perfect conditions.

Praised by professionals, these wine cabinets have been designed for wine-lovers who understand the importance of storing wine properly. The cabinets have properties that meet the requirements for modern wine cellars, preserving the quality and aromas of your wine with care.

There are two different sizes in the selection: the high 70-bottle wine cabinet (45 VLM) that offers enough space for a larger wine collection, or the compact 25-bottle cabinet (50 VL), which can be placed conveniently under a counter. The frame height of the 50 VL wine cabinet is 810 or 860 mm.

The high cabinet has an adjustable intermediate shelf that enables dividing the space into two different temperatures. In this way, you can tailor your storage conditions to suit different wine types and ensure that each bottle enjoys the benefits of the exact right temperature.

Citycold refrigerator-freezer 800 CF and 600 CF

Meet the only refrigerator-freezer in a drawer on the market! The Citycold refrigerator-freezer is designed to fit seamlessly within kitchen furniture, positioned beneath the worktop. It revolutionizes kitchen design and cold storage possibilities.

The front panels of your kitchen cabinets can be easily incorporated into the unit's facade for a unified aesthetic across your kitchen. Note that the required panels and pulls are not included in the standard package.

Citycold can also work as a standalone unit.

Citycold comes in two refrigerator-freezer models, 600 CF and 800 CF.

The upper drawer (C) is meant for perishables, with a temperature range of +4...+8 degrees.

The lower drawer (F) serves as a freezer compartment and operates with a -18...-20 degree range. Both compartments feature automatic defrost and drawers on 'soft closing' rails for quiet and smooth operation.

Dimensions for installation

A sideways view of the installation dimensions of appliances. All modules have identical height and depth measurements. The dotted line depicts the height required to turn the appliances upright.

If the appliance is situated next to a wall, a 35 mm distance from the wall is needed to open the door and ensure that the drawers can be pulled out.

Air circulation and installation with upper cabinets. A minimum of 40 mm of space must be retained above the appliance. Alternatively, a minimum of 80 mm of space must be retained above and behind the upper cabinet.

DELIVERY

All modules have their own electrical connections. This means that installing a combination appliance requires two power outlets.

Basic cargo (freely unloaded from the vehicle) €109/pallet. Festivo transport insurance is 1.1% of net value. Refrigeration appliances are delivered to the first place of unloading as separate modules, packaged and well-protected on transport pallets. The modules can be transported to the target location one by one and combined on site into various cold storage assemblies.

The appliances must be connected to a power outlet with 230V mains electricity.
